CAREER OBJECTIVE

Passionate about technology, I seek an environment where I can apply my knowledge, develop innovative solutions, and grow professionally within a dynamic team.

SKILLS

- .Net
- C#
- Python
- Go
- React (js/ts)
- Angular (js/ts)
- Blazor
- Node JS, Express js
- Web development (Html,css,sass,lees)
- Sql server
- Oracle
- Mongo Db
- Postgres
- DynamoDb
- Redis
- Cloud (Azure / aws)

LANGUAGES:

 English (B2+ /C1)

 Native Spanish

CERTIFICATIONS

- C# (IT Education)
- Javascript (IT Education)
- React (Education IT)
- Responsive (IT Education)
- Pre Certification: Met 70-61 SQL Sever (Microsoft)
- Web development (UTN)

ACADEMIC CAREER

Awarded:UAI Interamericana Open University.

Title: Systems Engineering (In progress).

Awarded: ITI Superior San Judas Tadeo

Title: Higher Technician in Computer Science (Complete)

WORK EXPERIENCE:

Dynamic Devs

(07/2023 - Present) | Senior .NET Developer

I participated in the update and modernization of the internal systems of the client Vida Security in Dynamic Devs, collaborating in the migration from .NET 6 to .NET 8 to improve performance and scalability. I refactored critical code to ensure compatibility with the new version of the framework, optimizing efficiency and reducing resource consumption.

Technological Stack: .NET 8, .NET 6, Blazor, SQL Server, Azure

Trick Studios

(04/2022 - 06/2023) | Senior Full Stack Developer

As a Full Stack Developer at Trick Studios, I worked on a project in the gaming industry, developing new features and improvements to the game. I used .NET 6 and Blazor for building the game's back-office.

Technological Stack: .NET 6, .NET Core 3.1, Blazor, SQL Server, Azure, GitHub Actions.

Coder House

(02/2023 - 06/2024) | Deputy Tutor for node.js

I served as an assistant tutor in a Node.js backend programming course. As a substitute teacher, I am responsible for teaching in the absence of the main teacher and answering students' questions and queries. In addition, I am in charge of correcting the challenges and final projects submitted by the students.

Technological Stack: .NET 8, .NET 6, Blazor, SQL Server, Azure

Coelsa

(01/2021 - 03/2022) | Senior Development Analyst

As a Senior Development Analyst in Coelsa's Debin team, I led the evolutionary development of financial products and actively participated in systems analysis. I also provided ongoing support and facilitated the learning of other developers.

Technological Stack: .NET 6, .NET Core 3.1, Angular v12, SQL Server, Azure.

Bank Supervielle

(01/2019 - 12/2020) | Tech Leader

As the technical leader of the insurance team at Banco Supervielle, I supervised and managed the activities of the technical team, ensuring the successful delivery of projects. I was also responsible for implementations and collaborated with architects to define the best technological solutions for the company.

Technological Stack: .NET 8, .NET 6, Blazor, SQL Server, Azure

Accenture - Banco Galicia Project

(06/2016 - 12/2018) | Tech Leader

I worked on the evolutionary development of multiple products using MVC architecture, collaborating in agile teams under Scrum methodology. I was also a technical leader, managing developer tasks, supervising deployments to production, ensuring quality control and participating in technical interviews for new IT resources.

Technological Stack: .NET, React, Microservices, Azure.

Arroyo Consulting

(01/2015 - 05/2016) | Ssr Full Stack Developer

I collaborated in the development and modernization of a digital banking platform, optimizing financial services. I implemented microservices in .NET with decoupled architecture, improving the performance and scalability of the system.

Technological Stack: .NET, React, Microservices, Azure.

EYNES EMPIS SRL

(05/2013 - 12/2014) | Jr full stack developer

II developed and maintained a CRM system (Odo) for a construction company, implementing custom billing applications and conducting testing and deployments.

Freelance - Software Development & Consulting

(06/2014 - Present)

Rocking: Digital platform with AI.

SMS Software - Kognito: Serverless messaging on AWS (Lambda, API Gateway, DynamoDB).

CFO Tech: Logistics and finance solutions for Andreani (.NET, React, SQL Server).

SYS BOX: Purchase management under construction with Azure and Dapper.

TransCore: Developed and maintained Azure-configured web systems for a North American project.

Tech Stack: .NET, React, SQL Server, Azure, AWS, Python, Node.js, MongoDB, Entity Framework, Go
